

# Mixing & Heating

# Digital Water Bath

## Характеристики

## HWB series

Вихревой миксер Vx-4 оснащен модернизированным бесщеточным двигателем постоянного тока, обеспечивающим 4000 оборотов в минуту на полной скорости для энергичного и мощного перемешивания. Быстрое перемешивание в течение 5 секунд. Смешайте пробы по 50 мл.

**Intelligent control**

### Temperature/Time control

User can set temperature and time freely, make the experiment easier

### Working Panel

This product adopts water-trough liner which is welded (or welded through one shot shock and extrusion) using imported stainless steel and its shell is made of high-quality cold rolled steel and is treated with plastic spraying technology, shiny and wear-resisting. With the electric heating pipe gripped into the water, it can heat fast and keep high heat efficiency, low power consumption. By intellectual digital temperature control, it will check the rise and fall of temperature so as to ensure the precision of temperature control.

Model	HWB-1	HWB-2	HWB-4	HWB-6
image				
Range of survey	RT-99.9°C			
Error on measurement	±0.2%FS or ±0.5%FS			
Resolution	0.1°C			
Range of voltage	110VAC/ 50 or -220VAC/60Hz			
Operation environment	-5°C -50°C , relative humidity 35%-85%			
Output relay	240V/30A (Standard)			
Operation method	Three button style, four steps continuous speed regulation with increasing and decreasing button			
Measurement value amendment	-4.9°C to +4.9°C			
Heating power	400W	600W	800W	1000W
Inner dimension	160×160×140mm	305×160×140mm	305×160×140mm	470×305×140mm
